

Jason Le

work experience

Royal Bank of Canada (Amplify x Ventures)

Developer, RBC Amplify May - Aug 2020

- Building a project management application in 2 weeks from the ground up using **Apollo GraphQL Server** connected to a **ReactJS** frontend authenticating using **JWT** and **Dockerized** for scalability
- Working in a completely remote environment while conducting online meetings and presentations

Carleton University: School of Computer Science

Teaching Assistant for Intro to Computer Science 1 May - Jul 2020

- Conducted virtual office hours, tutorials, and labs to better increase students comprehension of the course material
- Provided additional feedback on assignments and midterm submissions to encourage students to think beyond the requirements

Hoppier

Software Engineer Intern May - Dec 2019

- Initiated** setup on **CircleCI** and **Cypress** for **functional testing** in **continuous integration** pipeline which saved numerous developer hours of fixing duplicate bugs
- Wrote **GraphQL** API mutations, queries and resolvers for faster communication between services
- Created Slack deployment bots to enable fast, simple, and automated deployments to staging and production **AWS EC2** instances

Carleton University: School of Computer Science

Teaching Assistant for Web Development 1 Jan - Apr 2019

- Wrote new course material to introduce students into using **Git** for modern web development

Klipfolio

Software Developer Intern May - Aug 2018

- Worked alongside **QA** and **DevOps** to rapidly respond to production breaking events and pushed hotfixes to minimize downtime
- Used **Java** and **Spring Boot** to create **APIs** for transforming data stored on **Elasticsearch** with approximation and smoothing functions
- Developed a universal data visualization dashboard using **Highcharts**, **ReactJS**, and **Redux** to allow companies to create narratives with structured data and drive business decisions

community

cuHacking 2018

Development Manager

- Organized development projects and managed on-event digital support systems to ensure smooth execution during the event

Carleton Computer Science Society

Design Team Member

- Assisted in maintaining and upgrading CCSS website to provide students relevant and up to date content
